

Brenda Matias

Software Development

Profile

Graduated in Computer Engineering, working in the area of software engineering with emphasis on systems development.

I am a Front-End lover, where I always seek to learn and enhance my skills in this development modality, also proficient on projects that requires skills on Back-End development modalities.

Employment History

Software Developer Consultant at ThoughtWorks

April 2021 — Present

Part of the Thoughtworks team as a consulting developer providing services to partner companies. Currently working at the partner company Globo with Javascript technology in the media player for the Player Web and TV platforms (eg Tizen, WebOS).

Full-Stack Engineer at Mesa Mobile Thinking

March 2020 — April 2021

As a Full Stack Engineer I participated in projects in the areas of retail, healthcare (Dashboard and public content area). Using tools like AdonisJs, PostgreSQL and SQL Server for backend development, Vue.Js for frontend development, Gitlab for versioning and Heroku for deploy in an agile environment with Scrum as the methodology.

Full-Stack Engineer at Kurier

August 2019 — February 2020

Analysis, development and maintenance of software systems for legal management where I developed the desktop and web version of Kurier Meridio using Delphi 10, AngularJs, SQL Server and SOAP. There are also database migrations from new customers to Kurier Meridio, creation of report scripts, analysis of scripts generated by support.

Full-Stack Engineer at MV Sistemas

August 2018 — August 2019

Analysis, development and maintenance of software that helped hospital management. I worked as developer of the international version of SoulMV using proprietary framework based on Spring Boot, GitLab for versioning, Oracle for database and Java.
